

# State Assembly District 77

■ Downey  
 ■ Boerner Horvath

For your highest priority issue, why is it your highest and how would you address it?

**Dan Downey (R)**

My highest rated issues are all areas where I would return to **PROVEN** strategies. My opponent focuses on radical ideologies that do not actually work in the real world. Environmental policy is a great example. She rejects the one technology that can actually reduce California's greenhouse emissions in favor of a strategy that results in blackouts.

I ranked infrastructure as the lowest priority because California is investing in infrastructure that very few people use while ignoring our most pressing concerns due to radical ideological views. High Speed Rail is a great example of this. We pump **BILLIONS** of dollars into so-called High Speed Rail while our roads and freeways crumble.

For your highest priority issue, why is it your highest and how would you address it?

**Tasha Boerner Horvath (D)**
